

My name is Leslie G. My spouse and I met Dr. Bitan in 2006 when I already went through a failed cervical spine surgery from another surgeon. I was in a wheelchair when my husband researched and found Dr. Bitan. Dr. Bitan did my lower lumbar L4 &L5 that was a success.

Move forward we were in a car accident 2012 we were rear ended. My head took an awful whiplash which left me without the use of my right shoulder to arm and pain that was unbearable. My husband made an appt with Dr. Bitan and his associates. Dr. Bitan did 2 separate surgeries in order to complete my cervical C3-C7 fusion.

The 1st was on Sept 25, 2013 & 2nd was Oct 2, 2013. I am not going to say there was no pain but here it is Oct 28, 2013 and I am feeling a lot better. Furthermore I now have the use of my right shoulder and arm back which is wonderful because I am too young to suffer like I did prior to this surgery.

If you are FRIGHTENED of this surgery, if you are with Dr. Bitan and his group they will give you back what you lost - as he did for me. They will all give you the respect and time you need as far as helping you. All of them go out of their way to make sure you will be a whole person again. I love them all.

GOD BLESS DOCTOR FABIEN BITAN NOT JUST WITH HIS SKILLS BUT HIS COMPASSION FOR OTHERS. If you are frightened or want to speak to me I will help you through the rough water, my e-mail is:
