Dr. Bitan.

Enclosed find a picture of our youngest grandson on his pops shoulders watching his older brother play baseball on Saturday. He is three years old and has only known his pops as someone who played with you on his bed, couldn't go anywhere and had a cane that was fun to play with.

Later that day the boys and Keith played soccer in the backyard. I just wanted you to know how grateful we are for your incredible talent and your kind, gentle and caring nature. We both thank god that all went well that day, sept 13th 2005. On any given day, anything can happen but your knowledge and ability to perform with that knowledge, and your genuine caring and interest all entered into Keith having his life back, me having my life back and the two of us having our life together back.

He is still nervous and careful but we generally go everywhere, do everything and the most amazing part is that he is pain free. He lived in such awful, awful pain for so long and now, an occasionally pain here and there.

Wanted you to see how well he is doing and let you know how thankful we are. You truly performed a miracle on him. When you first told us about the operation you said maybe you could guarantee him 70%---if you weren't being modest than luckily your predictions were wrong

Thank you again.....

Arlene Parker
